8.7.1921 Friday 6 A.M.: C.V.V. at Papanasam

9.7.1921 Saturday 6.20 P.M.: Advice:-

The development is given to work from K and after it has acted in the system, further will be explained.

I am in gurading always and attending the progress alone. There will be no failure in it and the contract will be fulfilled.

As the Self system could not bear the outer pressure and finding its inability, the working is going on slowly. Hence is the delay in every thing.

No better way could act except the present follow.

As I have already said you ought to have arranged the management of the property to look after it by your son. That was not done and you feel that pressure. Further their mental attitude has been changed by some cause, which will not be revealed - and by that the respect, love & obedience even confidence too has been washed off. The value of the aura has been forgotton. The food you take is with very bad aura and with different thoughts it is served to you. So it is not palatable to you.

Re: Venkataram - let it be secret. The touch of this line is diminishing. The disregard and want of confidence predominating and makes him to wavering mind and stubborn in certain actions.

The present way of working this line with forethought has not been followed. You ought to have lived separately without any kind of outer attraction and disturbance to the mind.

The affection towards your children you had, did not allow you to be strict and this has caused them to become as spoiled ones. Nothing could be rectified now. The speed it has taken its course and it will take its own course.

The better results could be expected only after your completion. I have nothing more to say. Be calm and attend your own progress. If not I have my own work to attend.

30.7.1921 Saturday 8.45 A.M.: Advice:-

To be with free mind. The writing portion could be given only in certain touch and not always as before.

As the working is given from inner to the outer body seems to be feeble and you need not have any anxiety about it.

As your system is in this working order, that the speed which is acting to the T.M. will not be regular and so she

will not have regular touch.

Don't have any kind of depression about the worries and pressures and have firm belief as you had first. The speed that was given at start will have its own way. There is remedy for everything.
