

17-1-12

By this guess the observatory process comes with the working problem of right idea with the memory amalgamating the questions in principles undergone the disciplinarian system in the right equipment of the problem suggested the theoretical arrangements to rectify the stages by the vital appetite of unsolved solution to solve with the paramount Evolution and the involu- tion theories to give finite consolements, condensing the whole Unique method =

M.T.a.

17-1-12

(Maha Adhi or Mukthi Adhi)

In this term of speaking, Maha Adhi or Mukthi, the power that which is involved from the Nirvanic Plane, ascribes the forces of the semi-solid and some what semi liquid forms of action facilitates its function to the enormous sense virulent vibration in the Higher sense of the System.working up to the Mahaparanirvanic System Such planes have been converted into one Maha Adhi for the generation of Ist Revolution in the programme describing

Manual system working. Here we agree with the system of Higher force, where in contact with the higher solution = Though the inadequate theories do not evolve my theory but no differ in changing problem to the domestic sense but frustrating the Higher equipments with the expansion of lengthy Manual = However this potential improvement is the rather very high in spiritual aspiratory emotional in care anxiety and to deal with Higher entity. This bonafide principle deals with the limited problem inculcating the abnormal theories as such of these which I have said below here =

(1)Kodi	(2)Manu	(3)Haldho
(1)Panjal	(2)Gharadi	(3)Mandhe
(1)Porus	(2)Bishtu	(3)Mudhon
(1)Vasanay	(2)Barath	(3)Kantay

These various attributions of colors of people are bisected into three paths of languages.

Mathru Dhevay  
Pithru Mohal;  
Achar Bahavan ;

These paths are put up in the Upper plane degrees according to the

bisected portions. When in calculation these theories for the abridgement of the great gulf, this shows its formulated forms of curious bondage of training the punctuality in the prevailing attitude to the generosity of the public = When it is Higher in form to the diligent Manual, rely upon the abundance of relationship to the replacing the system. This purport shows the Building further system, to extending the Eternal Soul = The Soul vibrates its caution to the vital energy converting into the Solid Substance = The adequate pressure of the purified system gives manure to facilitate the system = At the commencement of the step what we were discussing in the Nirvanic Touch will be raised with the substantial things agreed to allow the passage to the further more spirit divulging all aura production - This Order of rectifying the system by three migrations of inner aspect volume. Of those planes can also be changed with the Divinity with the Universal Law can be separated to part with these and have to occur to point out the theoretical purposes = In establishing the stability in apt Law generalise and enunciated by the ancient authorities have not come to decide the further response put forth

by the Nature's principle = In this principle view of erecting the stone for the future Belief the figure and the description has arisen to have Symbols in Learning Knowledge. That figure gives adequate knowledge by framing it for its growth = The skeleton formation comes to the degree of graduity in the manner of erecting the corrugated iron bars which spreads from the accumulated knowledge coming out from the internal well = The formation of the figure comes to the terrible lightning in the witnessing evidence attesting the sufficient things to the further pilgrim within the body = The discovery of the Soul comes in and out breathing to give up the vitality in the way Physical strength = This maturity in the Spiritual connection has to acknowledge to attain the perplexity = The eternal soul gives its magazine Agenda list with eruption of poring further knowledge to the sense of activity = The further boundary is to be separted for the further work of the new Body = This Body gives its own commentary when we require the Parential garden of the Century events =

This thought is to be dealt with the Lower system, with the function of Higher system. In the same as we have touched in the Lower plane, the first application of the supporting system should be impressed as in the physical touch = That is this first step of combination with the Higher planes evolves the IInd Theory. The Production of Longation; This microscopical adverting in this Higher Plane comes to the degree of appretise in the Lower plane and one more plane is necessary to be filled with, and fitted with the controlling suggestion. This speaks all the planatory combustion according to the Height of the Power of One as marked out as Stars for the leaping spark endorsement system. This ventilates the duty in favour of the problem works within the jurisdiction upto this plane = Then the vital force picks out the instructions in accordance as how to give the further theories = The light spark boons in the lighting suggestion in the original come in the episcopal seat centre gives radii to the perceptual reflection by the wit of the rotation : This repels the forces of Stars to the magnetic sense to the vitality,

power in motion as in showing the gravity of the earth. This skeleton of showing to the inner aspects makes ready to spread out the sense in the national way, as to group all accumulation and to work out within the world only in that jurisdiction = And after attaining to the stage of unequivalent system the Force centres can be marked out, as to show the powerful degree so far it limits the enquiry = After it is fully filled up the Circular conduction, the thought vibrates the figure and begins to take up, the volumonous theory = This aspiration of reflection goes out even to the physical World - The vibration of the volume of figure gives its radii to the extent of 1,72,000,00 & miles in length and 1,500000 in breadth circumference within the circular radii in the way of diametrical sense. Then the vibration begins to calculate the degrees, and be giving production to the Lower planes. This observatory process proposes to gather information as to how to note and fill up the ground by good manure = Then New discovery land forms itself by the self assistance and with the aid of these matters becomes to grow upwards, absorbing all forces of the Developed Soul = Then it comes to the

degree of successive endeavour in the way of improvement =

M.T.a.  
18-1-12

This is the over mastering force that acts from the main link. This sentiment will never come to the seditious spirit as to mean the possession in any manner to the politic view but it magnifies to spiritual magnity to enforce in the way of attracting the public notion = As spiritual invoice of disappearing multitude will convey the public inventional suggestion = In utilising the public spirit to the turn of mind to a sudden change of explanation this views the aspect of respectful gifting of Divinity = This force when it is added to the memory of the physical touch gives distinction between ordinary person and to the Developed Soul = This affinity of succeeding progress for all the Result gives obligation to the steadiness of all reflections. This perfection in the affectional care scales with magnity in Diversity = This unity of success in Fidelity aversion gives nobility in the public curiosity : The light spark of unity of success pores stability in fairness of the institutional winning

utility. This active caution of absorbing link attaches no running thoughts but steadiness in moments = The universal Law helps all the available things to the monopoly of the flag = In treating the Forces in the 7 Divine centres = the currents passage is fitted with the wholesome stoppage, where it should erect the plan = In those figures they step in to the contract figurative in Form but affirmative in meaning = The joint combustional, The ready Block system, The affectional care, the magnetic prevailence The study progress, The enquiry suggestion, The preamble testament, The 8th Manual is suggested as spreading Manual. The real sense they may be pointed out to the languages. In these seven principles there are Three centres. Rising Star, Living Star & Setting Star : These stars work in the planes according to their degrees. The work which they turn out (Three Stars) as follows.

All can be done by Divinity.

Spark of Divinity.

(1)	(2)	(3)
Venus	Jupitor,	Uranus

M.T.a.

## I. Venus :-

In taking this Star for further procedure, as we have already explained the origin that how incarnation is made up, in the same way the developed astral soul or figure takes a route for the directory source to win the object of its own meditation : Here we have to talk about the Hierarchy of Venus - This means of the Physical plane is to finish the duty of filling up and opening by means of evaporation; This Force knot magnetic vibration which is action in the Ist Three limits of Adhi, paramadhi and Mukthi Adhi - in the IIIrd explanatory proof.

(Note - )

I. Physical Astral Mental

II. Adhi, Paramadhi, Mukthi Adhi

III. Venus, Jubitor, Uranus

It holds the centres 7 union to hold, change, and reserve for further work. It makes nerve function imagining all causes of further problem. Reincarnation Theories and inventional causes to oblige air phenomenal Doll lights giving gravity

has been obtained for the Higher mansion : These centres have been fitted in its own bodily simpler centres, and begins to the imaginary work by the sudden forces which is obtained from the problem of its own system and by its own fundamental idea of working, it creates new things - By means of this creation, we may guess the point that it has got all stock of intelligence in diverting all manure of life to the extent of its own Wisdom. It gives the seat of all wisdom for re-distribution of the physical ground of the body and by which the physical body accumulates its function according to the rotation which is marked out upto the mental plane = It gives higher powers so far it can say to impress the thoughts from the Lower of the physical plane and above and upto the Mental faculty to reasoning (Why?). This purposes the Solid observancies to store up all accessaries for the figure Building. The knowledge so far it can be derived from the Higher plane URANUS, according to its own graduity on its own accord realising the Truth of its own - This spirit gives its intellect to a sudden change of solid substance to give Blocks of whole system where it is necessary. and the lighter

manual of wheel grinding in the Intellect of Higher planes it gives its mason works and be also giving further proves and hearing as reversion of its work out turned by it, the creation reward - The reward for its out turn can only be marked. The reflector comes form the Higher plane through the Jupiter. Some times these have to act in the Lower Planes that is in Astral figures = This programme may be accordingly fancied with the aid of the rotation - The building upto the mental can be done by Venus ; This cage can be converted into gas solid and liquid. The substances which can be made as per accordance of the invention of Metals in the Ground.

M.T.a.

2<sup>nd</sup> information for another call

By this the intentions are passing upto in Mental plane in that Figure according to Height of the encroachment they have got in force = This identification mark refers to the Mental Touch to spring up to the high and go down to the Low Foundation = here refers of generating Atom, matter, Molecules. In this manner in other two stages two this combination is passing on

for the springing vitality force =  
M.T.a.

3<sup>rd</sup> Call

By this call it brings the observatory proof of explaining Symbols caution to the generation of New Nerves System how to back to the pocket - These races are suggested in the open air opening out of the reservoir as air in form and Figure some utterances and in other form as figures too = The development which the physical experience gives forth is the same as the development which the physical body has attained.

So, from this force we have to guess that the

I	st	Star	gives	information
II	nd	Star	development	
III	rd	Star	to	the Permanency.

1st Star in utterances as adjustments to the System cleansing and evoporating the whole body - and fitting new links where it is necessary to be fitted with= give: vibration as symbols, give: shakeness, gives nervous systems to

M.T.a.

This star may be utilised in a way to sense it as Leap Spark. This Spark degrees its own significance as "Symbol Light". That is Symbols showing Light passage by means of showing Lightning, Lantern of figure and as Spark of Wisdom of knowledge from the Divinity that is the Power of one = This also comments the passage from the Mental faculty and from the Mental conception= This continuing all productions of Manual or real causes in reality of success in rotation of successive periods to the unit of One and in one Unity = That is why, this differential form of organisation by many of the Hierarchies; as Truth of Wisdom, as spirit in Spiritual Force, and to God and semi God Symbol Spark fire burning as spark leaping from the blazing fire of evolving knowledge to the notorious temper of temperamental Wisdom. This passage of inequality in the active discussion of periodical revolutions and scientificises its own origins in the way of showing so many legends and Higher authorities and in the way geometrical and hospitable wisdom. This leads persons to the School Lodge where the Hierarchies live and to be managed with them: So in such of respect learning message

we hope that the passage for the Humanity in Spiritual form of cautioning to the study.

M.T.a.

18-1-12

In the study of Venus car movements, this car rises from the Lower plane and goes to the Original place = This absorbs so many combustion and forces from the Earth and produces New inventions from the accumulation of the theoretical investments from the practical mood of absorbing all combined Forces = These forces give its own manure of success to the further knowledge by means of springing up to the Higher planes : As it has no affection or desire to live once more in the Earth and to show all its own powerful acquired knowledge and nothing can be done for the physical touch until the reach of the Atom separation principle, its longing desire is within the bodily conception in expanding its own vitality power = Then This Star ventilates all its combustions in condensed formation to lighten its own expansion, and to seek remedy for the inner speck. Then the inner volume speculates its degree, in manipulating its lengthy

notion and begins to apply region marks of jurisdiction. So, darting spark appears in the same plane and the expanding spark goes outwards to join with the original course = This kind of rotation with the Astral Touch and the Astral view in sense agrees with the proposal of learning knowledge only living in the same plane. Then it feels the dignity how far its expansion can be flashed or reflected to the circle to produce its power; So, the then force which can be given only if it can be possible view to its own possession in conditional way or desire by means of improvement = So, the fibre net calls to its enquiry whether or not possible to move upwards or let it can be done to the downwards improvement in the same plane = So the forcible atom takes its own problem to discover some mass of condensed matter agreed with the proposal of spiritual knowledge, with the way, what it has suggested that the powerful One ; to apply some assistance to send up to the growth = So, such mass, of some condensed matter has got forces by which it has obtained. and derived from this Star

-----  
So this theory absorbs that the

vital power in it, can be called for, only for the imaginary purposes but not for perpetual prosperity and sensical views= And some authority can be winged out within the jurisdiction by means of giving discoveries through grosser substances to communicate to the discoverers =

M.T.a.
