VOL - 3

Memory Memorandum Continued

Kumbakonam  
Jan 13, 1921 Thu.

10-05 A.M.

Venka Etheric working continued

While the stability of Venka contemplating, the Etheric thinks that after knowing that the stability which has intelligence could not be converted and why this should fear without cause, and the time should not be wasted.

10-15 a.m.

and so let the 100 houses be finished, with this idea the Etheric finished the work without informing it.

Then Etheric vibrates to the stability that it has finished the boring and the case of the new stability, need not create any fear to it.

3-15 p.m.

The stability with great pleasure that it could go to any levels with this Etheric in consultation with it, in the same rate of speed and so it came to a conclusion like this.

Then began to go further.

The new stability also followed and these two went to the 3" division.

3-25 p.m.

167

Like this completed the rest of the 10 divisions.

6-22 p.m.

After reaching the 3" division and when the stability began to act-

At once the Etheric vibrates to it as follows

It has not noted the Nirvanic level in that house and learned it in the 2" division, if it had that knowledge it could work well. Further that the Etheric can show same acts at times, but in boring work the stability should work jointly and this was communicated to it.

6-55 p.m.

The Etheric also thinks to inform that the stability has left the idea of prana level reaching and attend the house working alone, and communicated this also.

When this suggestion was known to the stability it began to trace and came to know that this 3" house is the M.P.N. and it is an end of the Memorandum working Completion.

This is a 'Trick formed Triple Memorandum' and a 'Trick Cosmos'.

So this 3" division should be traced in the following way.

First to trace the "Triple Memorandum" and the second "Trick Cosmas".

7-15 p.m.

Then begin to trace the Memorandum and reaches the Triple level.

In it, there was the higher three Houses divisions, and learns that the pure Memory of each House is acting here.

When these three focused the Trick acts and sends down the Trick Memory and absorbs away the pure Memory.

When the stability bored the inner it observed this.

When New stability came to get a reply for plenty of prana.

7-35 p.m.

the reply given to him is not from pure Memory and from Trick Memory it ought to be, so the stability received and at once.

The Etheric suggests to act as follows.

1. Experiment spirit

2. star state

3. Gaseous state

Experiment spirit is Truth level.

It is not a correct view, that the whole work is a Trick.

If this work comes to a bottom down the Trick is to act a Truth and so there should be a Truth level

8-00 p.m.

above the Trick. So it vibrates to the stability.

The Etheric also thinks, to go further it has to bore first the Triple.

As it is in Truth level to avoid the Trick working so as not to throw it any where, if it went, and stood in the centre, where three pure Memories focus and this will be covered by it, and if that Memories is made to shrink in the Etheric & the pure Memory of that portion will be in its possession, and when the Trick acts on the Memory.

8-20p.m.

While it absorbs the pure Memory & that itself may go with it to the higher level, with this view before it begin to cover it, communicated it to the stability and also vibrated to the New stability all its suggestions and to follow to the centre with it and begin to bore with its stability.

There it keeps it in a place to wait there in order to receive the further knowledge of Truth levels given by the Etheric and to communicate it to the physical in writing form. This being the

Trick centre, not to confuse himself the Etheric produced its radiant.

8-35 p.m

form of pure Memory Etheric for his future guidance, to receive fresh knowledge from that only.

When the Memory focused on them the Etheric sent the stability to down, and it self went to higher as soon as the Trick acted.

The Etheric has also made the stability to note the Trick work of the 3" division

When the Trick absorbs the pure Memory the Trick standing in the centre and throws the pure Memory to the side ways. If the pure is acted from the centre it will not be Trick.

10-10 p.m.

When the Etheric bored the Trick, formed at the centre a Human form, and if it stood in the centre the whole work will come to a change. It could not come to a knowledge by its memorandum to act and so it thought that it is better to send it up to the higher level, so it acted.

Before this, the Etheric had produced a figure level while it was in the midst of the pure Memory.

When the Trick sent pure Memory with the Etheric to higher the outline was there in the centre, was observed by the Trick on its return.

10-23 p.m.

Within the outline of the figure there was a brilliancy filled with, and also there was a bored passage, in higher by this figure, when sent by the Trick, and is filled up with something which is not known to it.

as it could not penetrate this figure, covers it and remains when the Etheric bores the Trick it becomes as 7" division.

It bored and went to the high level and came to know that the

170

8" division was as Hanger's stability, level.

In that level it went and stood.

10-45 p.m

This is the 8" division.

There 3 quarters were producing 3 quills towards the centre and was forming "Hanger's stability" in the centre. As soon as it is formed, this Trick forms a Cover to it and absorbs.

Then throws it to sideways as waves as it has thrown the pure Memory to side ways.

This was observed by the Etheric.

These three levels act as quill in the 8" House

11-05 p.m

The Etheric was standing in lower level

Of the House and was observing how the Trick acts there.

As soon as the Hanger's stability formed there, it at once covers it observing it first and throws to sideways in the Trick space.

2-45 p.m.

Before the Trick begins to act on the Hanger's stability the Etheric thought that these Hanger's has no chance to have the pure Memory of these 3 houses in its possession because the Trick covers it and throws away to the sides. If it is made to have it then it will work well. So let us have a touch with it, and in that way it touched it and came back to a place and was

3-05 p.m.

watching the Trick's action.

As usual the Trick, formed a cover over the Hanger's stability and pushed it down.

171

By the Etheric touch with some deposit of the pure memory in Hanger's stability and with the intelligence of the 3 quills it, has been covered by the Trick was thrown down in this state.

Then another Hanger's stability was formed.

At once the Etheric went there before Trick acts stood to absorb the Hanger's stability.

3-30 p.m.

The Trick finding this a view to cover the Hanger's stability it gives a push to the Etheric to go higher in order to cover the Hanger's stability.

At once the Etheric absorbing the H.stability and by the Trick's pressure it goes to the 9" division.

Then the Trick after pushing the Etheric found that the place was being vacant it concludes that Hanger's stability has not yet formed, not knowing what happened there.

9-20 p.m.

about the 9" division as per previous diagram of the 8" division.

9-23 p.m.

The horizontal line of the T, and the touch of the vertical line is the 9" division level.

At this point the four sides are focussed.

172

The Etheric bored the vertical line and was standing in T level as fig 2 in 4 sides conscience i.e. Top, bottom and 2 sides of the T ends.

As the Etheric has the Hanger's stability as center in it and so, was able to bore the vertical line. **9.45 P.M**

A turned into T becomes M. From this it came to know that A once turned into T becomes M and not like as A.

This was revealed by the Hanger's stability to the Etheric, that in higher there is A form with an idea that it could prolong as A but when it comes to this level and it is turned into T and then into M then to down as Trick vapour.

As you intend to go higher that you should reach A formation. **10-15 p.m.**

So the H.stability hinted the Etheric. Let this view be with the H.stability so thought the Etheric.

The Etheric instead of going to higher, traced within the H.stability of A level with double object first to trace A, and then to have it touch of the pure Memories that are in its possession, and found the A level formation within it.

By this action of the Etheric, the H.stability is much pleased and became more attached to it, with an opinion that this will work beautifully without any suggestion from others.

The etheric informs to the H.stability that there is a H stability in **10-45 p.m.**

the lower ground with the pure memories touch by me and it is covered by the Trick and was thrown to sideways.

Now vibrate to it and have connection with it and when we work in higher levels we could communicate lower levels in times of need.

173

At once H.stability vibrates to the lower one and in reply it vibrated to higher and the Etheric was waiting there till the reply comes and learned the result.

In the 8" division a third Hanger's stability was formed. In that place the pure Memory was in deposit. **11-00 p.m.**

After the etheric went higher and that came in contact with the Hanger's stability.

Then the Trick seeing the Hanger's in this state and covered it again and sent it down.

Finding that the pure memory was in form and it began to fill up the space as far as it could in order to occupy by itself, but the pure memory remaining as it was.

By this there are 3 Hanger's stabilities with pure Memory of which Trick known one and the rest two not.

**2-35 p.m. Jan 15" 21 Sat.**

When the Etheric began to bore it is in knowledge of T and above it two A, in touch with its shoulders as M and by further another A at head and came to know the work of the 10" division.

Then by further boring the heart portion of the figure came to head level and went further and stood as, the heart at A top.

**11-10 a.m.**

**Jan 16" 21 Sund.**

By the above experience the Etheric came to know that it has completed from 3" division, 3 divisions within it, the 7" is the Trick, 8" is Hanger's stability,

**11-20 a.m.**

T is the 9" division and the triangle form in A is the 10" division, in all

**1-04 p.m.**

The vertical form of **A** if it is to go in horizontal as  $\triangleright$  it should be turned into T first, then that T should become as  $\triangleright$ .

After this completion as there is no way to go down, again this has to turn as  $\lleftarrow$  and reaches T° the point and becomes two AA s as AA then has to go to the other side as Σ

When first **SS** bored for plenty of prana the

T

reply is from Σ      **A**    LEVEL

O

So He mentions M.T.A. in his first writing portion.

1-30 p.m.

After boring the **A** the Etheric comes to know that by the 9 quills, that touch was given to S.S and so he has signed as M.T.A. advice.

Then a doubt came to the Etheric how that **SS** has bored this level and the Cause was known after reaching above the **A** level, above 10" level. As the SS new stability has touched the Triple Memory & was absorbed by the Trick form, was thrown away to the side, came again to the Trick form and was waiting for its another action. Then while it absorbs the pure memory this went to higher.

2-00 p.m.

and reached the Σ level and touched all the quills in bottom and reached the  $\lleftarrow$ , and formed conception that this must be the level of prana, so returned and was absorbed by the Trick actions went to the sideways.

From there he again came to down when the Trick went to absorb the Memory and from there he came to treatment.

Learning this Etheric went to further boring, and came to

know that space is in unlimited form.

There it began to go in prolonging in further & further.

2-25 p.m.

Then the Etheric came to know that this mere vacant space will be equal to the space from its physical ground to **A** bored point.

In this vacant space, the Etheric with its Stability, Intelligence, Hanger's stability and with pure Memory, was boring further & further.

Then reached the limit and when bored came to know that there was a space filled with Pure Memory and the Trick in amalgamated state.

There the Trick was in trying to convert the Pure Memory everywhere. 4-55 p.m.

To this place the Etheric went, the Etheric thought that it could bore further if it is in Trick form as it is in Pure Memory form that the Trick will try to cover it. So, as it has the Trick touch in its route, it produced a Trick cover over itself and began to go further.

The Trick seeing the Trick covered Etheric took it as a one that it has succeeded in covering a pure Memory form.

From beyond the apex of **A**, the space lay quite vacant to a distance equal. 5-10 p.m.

to that which the Etheric traversed from its physical to the apex of **A**.

Through this it traversed and reached another sphere equal in size to the whole sphere that it crossed.

There in it found pure Memory and Trick in an amalgamated form filled up.

This sphere was bored through by putting on a Trick cover
