

by the Etheric and its limit was reached.

At this limit it came to know that it reached the prolong line.

It thinks that this must be pure Memory and the Cosmas. By this **A** is

formed and the Trick work is caused below.

5-20 p.m.

To penetrate further the pure Memory level it should not be by the Trick cover.

So it shrank its figure within the Memory and leaving the Trick cover there went for further boring.

It instructed the Trick cover to fill itself up with pure Memory from there.

Then it bored the prolong line and stood as pure Memory.

Then it kept its form at the cutoff side of the prolong line not to stand in the way to the flow.

5-40 p.m.

It came to know that on the top there was the prolong levels formation, at the left side the cause of retortion, below the further prolong levels and on the right formation causes.

It came to know also that there were previously three cutoffs, and at present the 4th cutoff is in working.

It was not a ground where any form could become.

To bore further it is necessary to know how far it prolonged below, the cutoff side working and the levels formed above.

6-00 p.m.

10-20 a.m.

Jan 17" 21 M

Then it shrank form standing at the bottom of the cutoff level, it knows that the prolong so cutoff is prana working here and that **that place is cosmas** though each by itself cannot workout the **creation**.

It has worked already three and now it is going to work the 4th.

The 1st produced **A**, 2nd produced **T**, and the 3rd became **M**.

Not to stand in the way of the 4th cutoff, the shrank form came to the bottom of the cutoff level.

10-40 a.m.

It found that the left side from the cutoff level was entirely inactive and that all the working was on the right only.

By this it shows that the inactive side acted only thrice in the form of cutoff. But there was not any other slightest indication besides these three acts at that point.

That must be the cause for the prana working.

Since no other activity is shown at that point except these three the whole portion appears to be same and so there is nothing to trace out.

10-55 a.m.

The three single acts at that point should be the cause of the prana working here.

This cutoff level is therefore the cause of prana.

± From here C.V. is giving other levels it seems. Even after warning she was continuing the same. Only yesterday she was convinced and promised to have right touch, owing to mental depression she could not consult for the last 2 days caused by Kutty's action.

C.V.V. 2-2-21

± Written in the left side of the Note book.

As per Master's suggestion "**There is plenty of prana** etc., the prana and its cause should now be this level.

This must be communicated to Master, at once directly and by an independent route Master's stability received the reply.

The conception of the Etheric that prana is wanted and must

be supplied, itself acted as the kindling to this inactive.

11-00 a.m.

ground and a shaking caused

Since its activity is only cutoff and that too only by the point, so the shaking was unaware. Hence the shaking caused 'Why' from it.

1. "Excess meet leaky excess why"
2. "Improved made on guardian Why"
3. "One two, one two, one two, one"

(Cosmos means 4 sides acting. 3 sides tell us that the 4" is of one)

Standing at this level Venca sends her experiences to A portions as a deposit in higher levels (M.T.A.) so that SS might carry them from there to Master.

11-05 a.m.

all these experiences were on the 28" May 1910 night up to the 29" Noon.

Practice advice was from 1-30 to 2-40 p.m. written down by SS.

Before 8 p.m. in the night Self stability in connection with its gaseous figure in the quill house in filled it with full Memory of the Past, present, future and the start of the original view, began to bore without touching the Cosmic route, by a vertical path.

Before starting as per practice conception the raising of Kundalini was shown in mere active form since it has already became vacant and

11-10 A.m.

occupied by the original view. Keeping the physical Etheric in working of the view deposit in K's level and in conscious form to run the course of the normal life, the Self stability started forth.

Jan 18", 21 Tu

10-10 p.m.

about the Route taken by the self stability.

Self stability at 8 p.m. on May 29" 1910 started vertically boring the Meena quill in a parallel direction to the Prolong line and touched the Shain Pan.

CV shranked form also know that self stability would start and will

10-20 p.m.

meet her at her position.

The Prolong forms a shain Pan and a raising is given by to the Prolong by it. At every successive Prolong, a shain Pan is formed at the end. Beyond is Nothing but shain.

The cutoff is formed by the shain's Pan below, and the cutoff side and the Prolong Pan.

To bore the Prolong it must be by the raising quality of shain's Pan.

The Prolong has gone further up to shain's Pan beyond the cutoff and by that the limit is known.

C.V. shranked form knowing that a

10-40 p.m.

prolong will be forth coming, that thought of injecting it with a deposit of Pure Memory touch for the purpose of self stability's recognition of the further Prolong's limit that it is known to C.V.

This indicates that C.V. is conscious of the starting and the ending limits of the prolong and also of the cutoff side -the 3 sides.

The bottom side below retortion level was all filled by shain's Pan. The whole of that limit is a shain Pan.

The self stability therefore reached by the inside route of the Pan to the

10-50 p.m.

Other end of the Pan where the Prolong ends, without going to the Nothing but shain.

Ommit from here

It was then waiting expecting the further prolong action.

finding that there is some interval for the prolong action, it impar to the form of practice by the physical system all the cosmic knowledge to the gaseous figure.

The practice working forces were given by both the routes –

1. Cosmic route, forces were shown in the self system in outer treatments etc on Kundalini Principles,

11:05 p.m.

2. Independent route forces working innermost and not to outer.

Then after this waiting period the self stability reached the cutoff level, i.e., August 29th 1910 by 9.30 to 11 p.m. when direct working began, direct forces acting on the system:-

These work by the Original direct Route without touching the Cosmic levels.

The Cosmic route is Northwards towards the Poles and hence the old expression "**Mahatmas are in the Himalayas, go to them**" told to C.V. and S.S. 11-20 p.m.

4 p.m.

Jan. 20th 21 Th.

"Pan Principle"

There are two kinds of Pans –

1. formed Pan
2. formation Pan

about the penetration, in formed Pan by the stability & the gaseous figure.

The stability of the gaseous figure reached the center of the Pan of prolong line.

This came to know the cause for the whole Cosmos principles and in its work, the Man form is the highest, ware in the Pan.

It concludes that the Cosmos is the Highest position, that the tracing up to Memorandum and then from it to

4-45 p.m.

Man form is the highest at the end seems to be.

So that the Man form too could work like a Cosmos.

To the Cosmos one side work is wanting and to the Man form too one side work wanting.

The gaseous figure came to know of this fact of wanting by Pan's touch and in order to make it work the wanting side to the Etheric of the physical figure, it adopts a course.

In the Memorandum working the Etheric is dissolved into gaseous state. By the present trial of C.V.'s Etheric

9th a.m.

Jan 22, 21 Sat.

shows that it could stand even in Prolong level. So the gaseous figure with its Etheric should be made to stand in this level.

For this it absorbs the physical Etheric through the Pan route into the Self gaseous figure and from it to radiate to outer as Etheric, as a stability in order to swell all sides.

By this to observe first how this physical stands, and the second is to note that the small nature of the gaseous figure swell to the size of the Etheric or not.

When this work was given to the physical system, the Etheric working was absorbed

9-35 a.m.

as a gaseous cover to the stability portion as 360° Memorandum work focused into one point and was made to rise like the stability as that went on that day in the same way makes it reach the Pan level, where Self gaseous figure is standing.

360° Memorandum worked separately one by one is the Tric working, from the centre.

Now to the self Etheric this kind of Tric will not be in working because it is going to radiate on all sides in order to swell.

So there is no Tric working to it, and there is no Memorandum grades

10" a.m.

working to show.

1-30 p.m.

The Etheric was shrunked to a very small size, brought to Pan level and absorbed by the gaseous figure.

Then the gaseous figure went in boring the Pan which is of enormous size greater than an Earth. **28-1-21 Fr.**

From this lower level was revealed and (omit it now) to this went to inner & inner and came to know the cause of the sun, the formation of the Planetary and up to the Man form building by a Memorandum work.

When it observes the cause of the Sun.

"When the blazing sun is gone.

Well the Nothing shain's Pan,

Then the show Hill little light

Twinkle, twinkle all the light"

2-30 p.m.

That Sun itself is a Tric work in physical state from the Pan level and it begins, to trace it.

Then it came to know that Sun is a little light. As per previous record Notes Vol.1.

The blaze from the tube is 'Sun gone'. From this is the Reflexion Sun i.e. Little light. (This before earth formation)

When Sun gone, a Pan formed at the side of the Earth where little light caused.

This little light is working in the Memorandum as Twinkle light on the Earth, as Sun.

So to the Sun if there is Twinkle

3-10 p.m.

it will blaze. So this is a wanting to it.

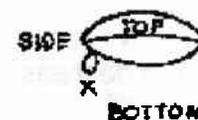

8-55 a.m.

Jan 23" 21. Sund.

after knowing the wanting it goes in further boring.

As there is causes in gaseous state of the past, present, future of the Man form so there is cause in the Prolong Pan of the Earth in it.

The pan revealed, that the Top has in it all the causes up to the Earth formation.

Side - the cause and formation causes of Earth.

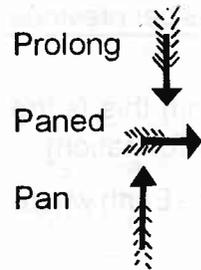

The bottom & the other side with no formation.

9-15 a.m.

These two sides further, will be known only, after another Prolonged has been worked.

The whole distance from the cut off to the Earth lies within the edges of the Pan formed by the Prolong.

In this Pan, at the left side is in gaseous state all the causes for Earth formation.

The 3 sides pressures touché the other end of the Pan caused another retortion at the side at this stage another prolong came and went to form a fresh Pan.

9-40 A.M.

This 4" side retortion is caused by the first Prolong, and it goes to reach other side of the Pan.

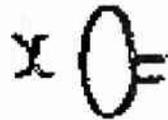

Before this reaches, the cut off level Second Prolong went.

The 4" side retortion being quarter work, so it could not form a Pan.

So the motion given by this becomes an Oval form.

3-20 p.m.

Jan 24" 21 M.

This is not like a Pan but mere an oval form circumference.

To this the cut off side pressure and the other side pressure gives a raising to the air within the Oval

3-50 p.m.

form and makes markings in this circumference as degrees.

In this oval form 2500 sroths running has been given by these pressures.

Then it became a well condensed form and the both the sides pressures became parallel to it, a quill was formed on the side of the cutoff, both sides opened.

This quill is like a Thermometer to act for heat & cool.

After its formation the filled up pressure within the Oval begins to radiate the two qualities of the pressures into the tube.

As the tube is opened on both the

5-25 p.m.

sides and it is also formed on the cutoff side the pressure given by this reaches the bottom of the tube and it is retorted by the oval side and causes a rising quality within the tube.

By this the tube is lengthened. Until the whole pressure within the oval form is exhausted the tube will be in elongation.

11 a.m.

Jan 25" 22 Tue

The Etheric of C.V. after observing the bottom limit, Earth formation side, the starting of the self stability, Prolong levels and the cutoff of the Prana side, it begins to trace the cause of the starting activity at the cutoff level in Prana side.

By the 3 sides observation it could not come to a definite conclusion the cause for all these workings.

Then it observes the Prana level and in its border at the middle point of the Prolong side was the cause for a starting of an activity.

It begins to observe from there.

In its first tracing that Prana Level was an inactive one and Now

11-20 A.M.

it seems that there is cause in it and so this should be traced.

The Prana side seems to be as it is, not a covered space. It is filled up by prana in all because as there is no limit or any kind of hindrance but filling up to any extent of space on all sides prolonging on that direction and not returning on any account towards the prolong side.

3-10 p.m.

By this filling up, the base line on the prolong side a thickness is caused on the prana side, and the thickened portion from prolong level to the height of its own and it is called 'pressures prana'.
