

186

The highest pressure given when it begins to fill up the extended space

3-30 p.m.

pressure touched the bottom side and by its retortion causes a height to it, hence a breadth is formed on the prolong side and it is called 'pressures prana'.

The point taken as the beginning for fill up, and the height as breadth & the length of the whole prana - filled up space be the line formed at the bottom of the height, is to be taken as base on the prolong side.

The prana filled space will be in unshakable state. When this goes to fill up another space, it should neither diminish nor increase in size, but remaining as it is separately, goes to

4 p.m.

bottom gives a pressure & it goes to fill up. Prana in another space.

The pressure given so remains there and from it the prana goes to another fill up. So remained pressure is called the 'pressures prana'.

In this way the base border is formed by the prana filling.

This was learned by the C.V. Etheric in tracing

above this 'pressures prana' level the whole space is lies vacant.

The base line is extended to unlimited length in the prolong starting side.

4-25 p.m.

While this Prana was giving such Pressures in extension side a spot of that Pressure Prana came outside the base line.

As it is a filled up one it remains there. the time could not be calculated, and was in Consolation form.

187

From Prana level it was in fill up & in filling up state and came out from pressure. So to its state nothing is in wanting. About the other Prana fill up it has nothing to do with it. So up to its level it is full and is in a consolation level.

A shaking is caused to it by this separation.

5-15 p.m.

In order to be in a stable position it goes to higher level from where it was standing.

About these levels no information was given when Prolong line explained.

"To suspend up to this" -

M.Venca

Even after this she commits the same mistake.

C.V.V.

2 - 2 - 21.

4-52 p.m.

Jan 28" 21.Fr.

Now begin to note from the left off level.

M.Venca

"Self stability working"

When the Practice advice given to do for one hour is, the stability to start, to take the gaseous figure and to bring also the Etheric in shranked state to the Pan level, on the May 29" 1910.

In 30' each took 10 minutes to join one another and within 30 minutes reached the Pan other end and was standing there, in one hour practice period.

After this has crossed the Pan, it begins to rise vertically towards the cutoff side.

5-25 p.m.

The self Etheric reached the cut off level bottom, where C.V. Pure Memory figure is standing and after its contact to it and without going in vertical, further it began to bore in Prana side.

This bored and reached the Prana limit and that time was the practice ending in the physical body here.

The boring was observed by the Etheric of C.V. and it came to know that the self Etheric has reached the Prana limit.

**7 p.m. Feb 16" 21 w.**

The experience of C.V. from 4 to 7 p.m. today.

An oval running over the physical a shaking began from the K part and went to higher in right side through the nostril breathed out like a bubble bursted sound. Then the whole figure into two halves separated feeling and was like a dead body feeling with exhaust of K's air & shrinking of all the quills of the Memorandum.

There was no organs work. Then the shaking in palms only.

Then a opening like box cover opened from front in skull and the Etheric went out and it was covered again. By this the Etheric came give conscience through each molecule of the skull from any level by the Etheric.

From opening to work cosmic conscience & at top the levels.

To work the physical conscience in outer.

To this to work the system from the opening horizontal circle & 360° conscience to physical.

**6-50 p.m PRACTICE BEGINNING. Feb 19" 21 Sat.**

This was completed within 5 months.

The Self stability and the pure Memory reached the Prana level on the first day of the Practice.

(some development was given to note further at 6-55 p.m.) for 5'

This was mixed in the Pure Prana level and it took 5 months for it.

To commet that leading to the physical through the route

taken by C.V., took 10 years, to prepare the cosmos.

Further is disturbed and some development was given to C.V. for moulding. 7-10 p.m.

**7-5 p.m. Feb 27" 21.Sund.**

"Chandu's stability working from outer"

It was in Kanya house.

From that house it began to observe the self and the Venkataram's stability and came to know that a stability is going to work in Venkataram's system.

For this it traced his gaseous figure and noted the molecule in the house and its degrees.

To suit that degree it selected a molecule of one Navathreya Rishi(నవత్రేయ ఋషి) who has gone to that level in cosmic evolution.

**7-30 p.m**

after its birth to work its intelligence as per view of the self stability.

This molecule was in above the level of the house and it was brought by the stability by putting a cover over it and from that level is to work the Houses quill and standing it self at the bottom of quill(Chandu stability instead of its own stability) absorbed the Molecule through the quills & placed it to act as stability would do to work the Memorandum.

Then only it came to know that it is going to take birth again.

When it began to observe this, it

**7-50 p.m.**

came to the level to show its intelligence from its original shrinking state it has taken in its past evolution.

It was in that level in gaseous state since a crore of years as unmolested.

Originally it ought to have worked 10 times of that period to reach that level, in non-shakable condition.

As soon as it is disturbed it came to conscience, that **this working is a New one and it should be learned only by experience.**

8-5 p.m.

By this a depression came to it. At once Chandu's stability changed it, to encourage itself to learn this new intelligence that has worked the undisturbed state to go to this level and to have that experience in addition to its own. 8-10 p.m.

7-38 p.m.

Mar 2" 21.w.

"The Earth breadth pervading"

Severe astrology secret exhaust dome energy vessels physical dream fixed figure turnout, figure rhymes working Landers last kept form.

6-40 p.m.

Mar 23" 21.w.

The Cause of Oval form

(one "1" – The front is called "Olidere".

The back

"Occidere".

Let us take the Oval form of the Earth as 1 above said. A filled figure.

The front could not be recognized by the Back of the same figure, is a quality of the "1" (one figure)

"This is the cause for Earth Creation"

"Olidere" means

That figure which is in conscious of the back without the obstruction of the cover –

7 p.m.

In a single point all the sides, the inner filled up should be focused to come to the conscience.

This kind of conscience should be worked to "1" (self) and also to other forms when tried.

This is a rare thing.

If it is in that state it is called 'Olidere'.

The cover of any form should not conceal the other side.

So this Earth should be converted to this state and the other side of the Earth should be visible from any degree if observed.

Then it is a **Olidere Earth** and will work as **Occidere Earth** in future.

5-45 p.m.

Mar 27" 21.Sund.

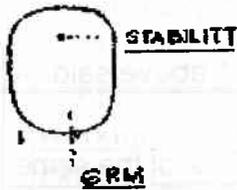

Memory, Memorandum.

1. Memory Oval form
2. Memorandum Oval form

About the Memory Oval form

In the center the stability, in outer oval form in degrees of 360 and between these two in breadth pervading in a day from 6 p.m. to 6 p.m. is the Memory.

192

Degree '1' begins at 6 PM and runs in right side and ends in 360° in the left.

7 p.m.

Mar 28" 21 M.

In one degree, per minute 70800 views are produced.

This will not come to the conscience but it is given for inner working.

To outer 800 are shown per hour in one degree.

At this rate in 24 hours the views are given to conscience to human form.

In this way it begins to work from 6.p.m. in the first degree of the Memorandum, and at the right side to the figure.

The beginning is given in the first degree in Vapour Giddiness.

7-15 p.m.

This is called the "Consent degree". That is to work the memorandum with Memory in all 360° has been agreed and so it called like this.

It is to work at the stability level in all sides as one, and at the oval form one by one.

As above said 800 views are given to conscience per hour to the Memory in touch with Memorandum.

As it begins in the Vapour giddiness & in during the whole night 180° are kindled in Memory to come into conscience.

During the day it keeps to work.

7-30 p.m.

In conscious state what it has filled in 180°.

In daytime in the left side from top to bottom 180° is filled up to work the Vapour Giddiness what is required.

193

There is a difference in left side working.

During day time both sides Memory in a mixed form begins to act in some degrees levels.

1. Memory filling up in Memorandum.

2. Memory filled up throwing out.

7-55 p.m.

Exhaling – Throwing out, what is filled up in Vapour Giddiness in the night, to the oval form to fill up in each degree, then the view comes to his conscience.

In the same way while Inhaling.

6-25 p.m.

Mar 29" 21. Tues.

**"Consent Degree Views"**

Stability is like the Pituitary working on all sides.

First degree Memory production. Hour duty of 800 views.

To classify the Memory as –

a. Memory Conscience

b. Memory Vapour

c. Memory Giddiness

First degree work begins in giddiness at 6 p.m. in the right side and at 6 a.m. on the left side at the top of the head.

At 7 p.m. the Production giddiness.

6-40 p.m.

Begins as sleep.

The increase of Production and the giddiness both turned out into form and then it goes into Vapour Giddiness.

It is acting in the following order.

1. Giddiness

2. Production

3. Vapour

1. Giddiness has cause in it to produce sound
3. Vapour has the cause in it to produce Sound in quarter and in rest of the quarters going in Vapour.

**6-55 p.m.**

2. Production has the quality of not producing sound even though it is in Conscious state.

**6-10 p.m.**

**Apr 1" 21. fr.**

1. Essence of Pillar
2. Aboriginezation
3. Caronate corresponds cutoff
4. Olgerly Productions.

**7-15 p.m.**

Lungers contonment.

**6-15 p.m.**

**Apr 4" 21.M.**

1. Essence of Pillar
2. Aboriginezation
3. Caronate corresponds
4. Olgerly Productions.

The last, if reached i.e. Prana Border

1. Ring nothing not
2. Derath Haith Hairs – if this level is reached there comes the Pan form.
1. Writing bags
2. Heavying relupsion limit within Pan the above two.

**6-45 p.m.**

"Hip bone Kindles lever Lungers start"

Explanation

The K's air is pumped out and refilled with the view.

By this a lever action is shown to raise the Lungers to start

the human form.

Having instrument

Humps Heves

To a human form there are –

Day preserved & night preserved

To self practice has been given in Night preserved.

**7-10 p.m.**

To the self there was a regulation for 40 years by fillupping the view.

The time given 8 p.m. to practice, is to work the 3 giddinesses from 6 to 8.

Then the practice beginning, at 8 p.m.

To observe the Kundalini raising.

**1-40 p.m.**

**Apr 6" 21. W.**

(Further subject given on the 4" inst is noted below)

In the human form which is fitted to bring all the facts from the brain to the Memory Conscience.

The production giddiness has the quality of throwing sound & sight.

**1-45 p.m.**

As the K is working in side ways in Memorandum, the stability in order to work it as per its view from the centre of it, began to act inside of the memory cover reached the joint at Hip bone and penetrating the centre of the K pervades the whole space and rises.

By the above action an horizontal circle is formed and with that breadth after filling its own view gives a pressure motion to the space occupied by the K.

When this pressure given the whole Vertebra began to raise

with Lunger's not cut off.

By this it come to the leading.

**2-35 p.m.**

Of its own, it bored the Vertebra and reached the brain portion.

When the raising given with the Lungers the pressure touched the Memorandum and retorted. This came to the stability and was thrown to the Conscience of the self system at a time of the 360° and the **K**'s actions in each stage.

Then below the Hip bone up to the Earth level went down to the foot portion formed a circle to be in Lunger as above was.

At this time the practice came to a close at 9 p.m.

Then the stability before it goes to its further boring work, to inform

**2-45 p.m.**

the astral went its house.

There it observed that the astral was injecting the stability view to the **Comet** and it has passed that house.

As the Comet was in its returning, it took it as a better opportunity, kindled the astral to follow the Comet and in the back itself went.

Then it was 12 mid Night when both the giddiness of day & night in the **meridian**.

In that month the Comet route was in boring level to the Earth, as the stability took that route to bore the Earth.

**7-25 p.m.**

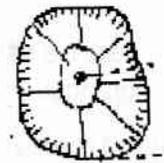

**Apr 24" 21.Sund.**

**Stability Boring & breathing work**

From the birth Lagna house the astral working is called **Boring** work and the stability entering the system when comes out in order to give retortion work is called **Breathing**.

**"HensKept"**

As soon the Matter enters the womb there it is kept as in diagram and it is called 'Hens Kept'.

**HENS** The oval with 7 connections is kept.

In the oval circumference there are 64 divisions.

**9 a.m.**

**Apr 25" 21.M.**

It takes 27 days to have 7 connections and 64 markings.

This 7 is to take as Boring numbers. The 64 as Breathing numbers.

The stability formation below the quill & from the Gaseous figure is to divide the house into 3 Tenths.

In the first Tenth degree the figure formation is different & it will be in rotten state.

Second Ten, the birth place i.e. father and mother will be in poor state.

Third ten, will be in wealthy state and after birth it will be in declining state and had to earn self.

The rest of the degrees will be in different states as abortion etc.

**9-50 a.m.**

The self birth is in the Second Tenth, 3<sup>rd</sup> degree is the Memory stability reaching.

The quality of it-

The stability is formed by the level between Tenth and before the formation of one degree to the Third Tenth.

That is in the  Centre as  stability
