

198

So to take the Second Tenth for birth, it passes 9 Houses and penetrates the 10<sup>th</sup> in Simha Lagna in father body in the first degree.

10-25 a.m.

The gaseous figure will be in touch with the first degree of the house, and to take it as gaseous house above the Memorandum.

To give a Memory from that gaseous house

5-25 p.m.

May 3<sup>rd</sup> 21. Tues.

The Stability enters a human form in 7 borings in any one and after going round all the numbers and reaching the same number and the degree, passes to womb to further work.

After entering the womb it begins to act as centigrade in the Breathing No of the females at that time.

This is structure Breathing No in womb.

After birth there is another Breathing No with stability entering to work the system separately in outer field.

In the womb 64 Breathings are worked in Centigrade each before the figure stands.

9-40 a.m. Advice

May 8<sup>th</sup> 21. sund.

"About the 10 years progress"

By this development in the physical system, what has been done?

Is to take all the human forms of the town will be in running in the same degree in the rotation of the Earth.

The stability begins to swell the system as per astral by kindling the Etheric.

This is shown in 2 Tenths grade i.e. for 20 years, without going to the shrinking level.

199

Then at the 1<sup>st</sup> year after 20 years it begins to show the shrinking level within the bones equal to what it has acted before.

9-55 a.m.

The astral figure movement in each house will not come to the physical system conscience but it will be in touch with the stability.

The stability will work to distribute what is filled up in the system but not from itself.

By this the view began to fill up the stability from the beginning of the House in order to work the stability to take up the fill-upping from itself.

7 p.m. Olidere Reg.

May 15<sup>th</sup> 21 Sund.

Since 6 months by this regulation given to the Earth a weight is added to it.

Before this 1° was in raise in its declination.

The weight is much added in the bottom side, and by the increase of this the declination lift will be going on.

The Olidere regulation has come to Thula Lagna up to this date.

It is in the first division of this Lagna and it could be taken as a 'stood' once.

Owing to this regulation there was no proper communication to give advices. 7-10 P.M.

After it has reached the Kanya the astral leading was given to the bones and it has began to work.

After reaching the 3° of the Thula the direct communication will act in proper.

Here after the working of the self system will be by the pressure of this line and not of the Planetary.

There is no practising to you and you will feel

in the brain portion with unconscious state.

You need not have any kind of anxiety about it.

Further by tomorrow.

M.Venca

9 a.m.

June 2" 21 Th.

Stability Beat, beginning Kundalini views

High acting Ida seed next Pingala seed, ambrosin actions of amelioration in the outer Memory.

The conception of the above-

The Kundalini filled up view is made to pervade in the system through the Ida and Pingala in order to receive the stability reaching and to work the memorandum as it prepares in outer moulding, in the same system to give growths.

8-20 a.m.

June 6" 21.M.

About the Memorandum.

Before the formation of the Memorandum the following is about the "Randum"

There are two kinds of works as 'Randum' and as Memorandum, 'Randum' could apply to the Earth, Human form & to the Zodiac belt.

To form a figure in Rupa principle, that which is in store many parts in prepared form is called 'Randum'.

8-30 a.m.

A state between these two is called 'Dust' |  
Above the dust level is air state. |

June 15" 21. Th

1. Libetham
2. Lahitham

3. Thathvatham.

These 3, vacant spaces in involved is the **Shain** state.

5-45 p.m.

About the stability Nature

Memory, Memorandum works in all forms, but the Life working is a separate one.

The Life acts as waves like the lightning.

To a human form the Life wave is penetrated at birth time with the stability.

To form the deposit in the father the stability standing above the head acts through this Life wave to him for 2 months to accumulate the matter.

Then the Memory

6 p.m.

alone is sent to the womb to form a Memorandum and after the completion of moulding it is thrown out as physical body.

Then the stability enters and begins to radiate with the pressure which has accumulated from the outer air over the earth, up to the Memorandum limit, and again it is not retorted to the stability but goes in degrees distribution as conscience working.

So the outer Life wave that is given to the system without reaching the stability portion goes in 3 kinds of giddiness in Vapour.

6-47 p.m.

in degrees calculation in conscience working.

So the stability distributes only what it had accumulated the pressures in above earth and in the above astral level, and after it had exhausted the whole accumulation it never cares the Memorandum but will be in attempt to liberate itself.

202

If any pressure is acted from the quill direct to human form this will be absorbed by the stability as deposit. There is no chance to such work in this Cosmos.

7 p.m.

and so it had to go to the quill level for the next birth.

This stability in order to radiate ever it should be in receiving the Life wave retortion from the Memorandum and to distribute the same.

To keep the system in prepared form many tests tried already and by the Olidere regulation this kind of want when observed in the system working & in order to rectify it before 'Reaching' a regulation is given on the 12" to complete it.

On the 13" the retortion from the Memorandum has begun.

7-15 p.m.

To day it has reached the stability, and it will absorb it and will begin to radiate.

This work will be finished within the 30" June.

By this the present Memorandum i.e. – physical body will be changed in to New type so as to receive the 'Reaching' in prepared state.

To observe the radiation from the stability in conscious state from to day.

Further by next call.

**7-20 p.m.**

5-20 p.m.

**June 19" 21.Sund.**

The View quality & its working

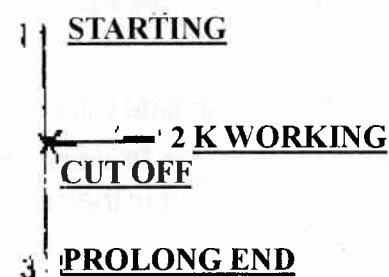

The suggestion given when first treatment is taken to Chandu by Self a begin is given to the stability.

This is like a Prolong start, from the end of the Prolong line

203

towards the starting point, and it is the direct work.

This starting reached the 'cutoff' point and observed the 3 levels work as in diagram.

5-40 p.m.

By the falls of the starting the view that went in boring work received mere energy and began to work in more clear form.

By this it was in a floating state without any obstruction to the Prolong flow.

Then it went to Prana side and came to know that the Prana has no connection any of the sides.

On this Prana level it went to reach the prana Less limit.

Reached that level and it was floating there, where, is no energy to act upon the Prana from Less state.

6 p.m.

From there the View began to kindle the Prana i.e. from Less level.

If one Prana is kindled to work the other Pranas that are in filled up state will also be kindled to act.

Re. the question Why?

The energy is kindled in Less Prana level. By this is to apply the words, → → improved made on etc.

**204**

The kindled energy means the retortion from that will be like one acting towards the Prana side as a questioning Why?

To a Less state on energy wanting state a Kindling has been given and it has kindled all the Pranas want

**6-20 p.m.**

and so the Prana filled up side will be working ever.

The nature of the work of the Prana will be fillup in the space on the other side and will cutoff in the opposite side if anything comes to it contact.

On this side it has been bored by the view and it has been kindled to act. So it has been made to act on this side which is in want of Prana.

As there is Plenty of Prana and as it has kindled by the view to work for ever to this field.

So there will be

One two, one two, one two & one two.

Instead of one to the Prana side.

**6-20 p.m.**

**June 23" 21.Thus.**

**The Prana receiving grades**

- C.V.touch 113°

1. Calling nerves
2. Currents nerves
3. Correspond nerves
4. Connecting nerves
5. Continued nerves

To bear any kind of Pressure in the physical system first the nerves were developed.

**205**

By this the decay could be resisted by the above mentioned 5 kinds of kindling to the nerves.

When this work was given to the self system the following portions were kindled when first

**6-35 p.m.**

practice was begun.

By this a method was established to other systems to develop them.

The touching portions:

1. Memory maintain wheels, in the top of the head on two sides.
2. Heart heightening intellect inner wheels  
In this 2 kinds are working.

1. Heart height intellect wheel.
2. Intellect wheel. Without going to heart works in breadth.
  - a. To kept to work the breathing
3. Hinting inner heeling Lungs wheels.

**7-5 p.m.**

- In the Lungs portion it is branched out as 2
- b) Living Writ Tight received wheels – To circulation side.
  - c) To Lungs direct.

Up to Kundalini, the digestion Kidneys, and intestine organs worked by this.

To each Lung 7 kinds of workings are given to lower portions throw.

The diaphragm receives the 14 pressures of the Lungs and from its center it retorts to intellect wheel.

( 2 ) by a tube

**7-25 p.m.**

and acts in that portion around the head for Memorandum work in 3 kinds of giddines.

It also acts to circulation to the head portion.

The diaphragm while acts to the lower portion its middle portion shrinks, and when it acts to head portion its middle rises.

While it acts to lower the pressure given by the Lungs acts it goes to 2 extremities and goes to Tympanum sides in order to work that portion of the Memorandum.

**7-40 p.m.**

The Lungs produces 14 kinds of air pressures to the artery, and each pressure causes it to produce matter as puss, watery etc to each artery.

The diaphragm's extremities pressure goes up to Vertibral column and passes into to it and goes through it to the head portion. From there the air pressure given is also passes through it goes direct to the Kundalini in 2 ways.

**8-50 p.m.**

**June 28" 21 Tue.**

C.V. touch - 175

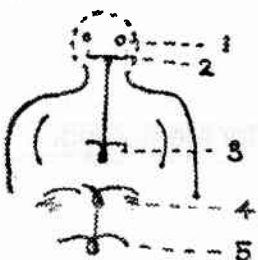

4. Cutting connected calling rows diaphragm workings.
5. Reveal received healing inner instrument wheels.

Diaphragm 2 extremities work acting on Ida & Pingala to head portion.

The above said 5 kinds of air pressures are acting in principle on human system up to diaphragm working and not to further lower levels.

The lower is worked by the pressure caused in higher working.

**9-30 a.m.**

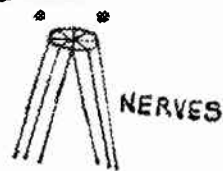

1. air pressure acts from two points and forms a Centre in the middle to radiate.
2. From that to Intellect and retorted in circle form around the head
3. Then at Lungs into two branches, one

to heart circulation and the other to air pressure to the right lung.

4. This branched out into two goes back to Ida & Pingala and acts to head.

**9-40 P.M.**

The following subject is connected only with 2 points working in the system in nerves connections up to toe.

At the head portion the circle formed at the center, the nerves are formed to the system are to be taken as in 360°, and in the middle of this degree 5 kinds of nerves are also formed to work as given in 5 forms.

as soon as the Matter is deposited in the womb it begins to form the above said nerves, In one month without any kind of other Absorptions.

Then the bones forming - 360 bones in one month.

**10-10 a.m.**

Then the air pumping is given to the nerves from the head portion the matter is kept in airy state in the midst of the blood while the 360° marking is going on, it becomes as airy state and that air is pumped to the circumference.

This meets the blood at the circumference and the blood matter and the bones are formed.

Within it, the formation of nerves goes on.

**3 p.m.**

**July 2" 21 Sat.**

**The Prana acting within the figure principle**

The two points forms a center, parallel to Intellect portion, where the Matter is in deposit.

When this Prana acts on it, a raising is given to the matter at that point and from it the Prana radiates in a circular form, and
