

forms a circle as Memorandum.

This circle will be within the out side blood deposit in the womb and 35 radiations are given from the center.

From this 35 kinds of Pranas are divided from the center.

**3-30 p.m.**

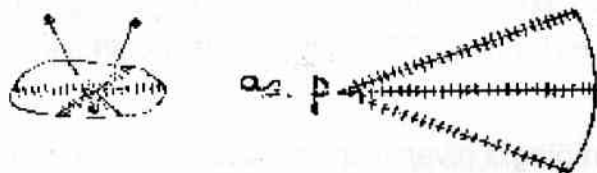

In the first radiation the flow goes through the radius.

Second the memorandum is formed by the radiation.

Third the Prana radiates the memorandum running.

In the fourth radiation, the Memorandum pressure is given to the Prana branch and 35 divisions are formed within the radius.

While the Prana thus radiates the Memo marking is given in outer to this radiation.

**3-50 p.m.**

after the formation of this 35 divisions, 35 kinds of pressures are given by this and another circle will be formed by this in the Memorandum outside, and cause for nerves formation.

### 35 divisions work

#### 1. Power electric

The vibration given at the first branch penetrates all the divisions and reaches the outside the 35".

In the same way from another radius will be from the Prana center & will reach 35" as above said.

There it will form a circle with a

**4-25 p.m.**

with 18 radiations from its center, by absorbing from side ways.

The flow from this will travel through the Memo circle & will reach the point.

While it is forming 18 divisions the over flow from this goes round the circle.

This circle will radiate 18 kinds. This is called "The **Electric Hiddens branch**".

The remaining 34 pressures will reach the circle and each will Produce 18 kinds of Electric Hiddens branches pressures.

The first division pressure in the 35" acts the air produced from this while it is acting to absorb, some air goes out before 18 divisions are formed.

**4-45 p.m.**

and that air is called **Electric currents**.

After 18 divisions formed circle is called "**Electric form**".

2. division pressure

This reaches the Electric form and begins to pervade

18 divisions has already been formed and so this begins to penetrate each division and filled up.

This is called **Motar**

The Electric has the capacity of absorbing and so the circle formed first absorbs the outer currents and its 18 divisions

**5.10 p.m.**

Now begins to radiate the Motar to it which has newly acquired by the 2" division air.

(By this a House power calculation comes to work the present figure)

3. Division

To take this as '**air Currents**' from the beginning point if a

## 210

start is given the work will be completed. The whole passage will be filled with air and not with any thing else.

After this a circle is formed with breadth with these kinds of passings as; Electric, Motar and Air currents.

In the Memorandum circle in 35 divisions in interval spaces there 3 begins to radiate to distance.

**7" p.m. July 17" 21. Sund.**  
from this air currents 35 kinds of currents are formed.

These currents instead of passing in horizontal it passes in vertical.

**7-40 p.m July 25" 21.M.**  
If Electric is produced it forms the Motar to act.  
First. Electric is formed and it goes to form a circle

2. It is to be taken then as Motar
3. full upping as air

By this the air currents are formed (Not the air currents went in vapour in first)

**8-5 p.m.**

The Vapour currents that went in the first, is connected by the 18 divisions working

The pervading quality of the Vapour, having greater speed is again shown to the 18 divisions and fills them also before these begins to radiate.

While it is radiating up to the end of the Vapour level this radiations marks 360 divisions in a line and producing Heat quality.

**1-30 p.m. aug 1" 21.M.**  
These radiations marks 360° and the heat quality.

In this Electricity Motar and air currents are working in each 35" division and each degree has the capacity to work in the same way of producing 360°, heat quality air currents.

## 211

The prana touch from the 2 points in the head portion in the Matter, gives a raising to it in vertical and that goes to work in Electric principle.

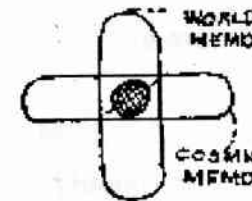

After this the Prana goes a little higher up & remains there.  
**2-30 p.m.**

In the matter portion after the formation of 35° in the circle and the 35° marking in the radil one by one on the raised line from the Matter and causes a raising as Electricity.

The Electricity has the absorbing quality.  
**"air Escape"**

That stands in higher up after a raising is given to the Matter is 'air Escape'.

By the pressure of 33 X 35 causes the raised line to absorb the 'air Escape' of 33 divisions.

**7-15 p.m. Aug 24" 21.W.**  
**Present state of working**

In the physical system – the levels.

1. Memory
2. Memorandum
3. Stability
4. Etheric
5. Kundalini air.

These are working in the human system and in the same way the world too is worked out.

Cosmic Memorandum – Zodiac belt.

World Memorandum – Top to bottom to the Earth is formed and it has greater Capacity than the Cosmic Memorandum.

Two quills are formed

**7-40 p.m.**

from the world Memorandum towards the Earth Poles bottom side, and at that point a Pituitary is formed within the quills.

It is called the 'World Pituitary' and it is a World Memory also.

The bottom Oval marked degree is said to be the stability to the Earth.

The remaining Oval form is the Etheric to the World.

That which is filled up in the middle of the Oval form is like a Kundalini filled with air.

To the Earth there are 2 kinds of pressures, but only one goes to it.

**7-52 p.m.**

1. The Cosmic Memorandum pressure acts as Ether to the Earth
2. The Oval Ether pressure goes to World Memorandum and not to the Earth.

**8-45 p.m. advice**

**Aug 29" 21.M.**

The working capacity to the Earth has been increased by the Olidere work.

All the working of the Constitution is also increased in Capacity and the remedy to the Planets working is also added to it.

By this increased speed to the Constitution the human bodies on the Earth will be placed in a state of Giddiness and will act as lunatics. First without thinking they will act and then they will feel & repent.

As some wonders shown in ancient times by some Sages through the influence of Kundalini, there

**9" p.m.**

will be some wonders shown in near future by Olidere Kindling.

Even from the wisest to child will be in a lunatic state of action and in uncontrollable state up to Comet tyre.

In one sense the filling the view in Kundalini is the Cause for all these scenes.

The C. Venca Stability with the Etheric will reach the World Comet tyre on Sep 23" 21.

On that date the World Pituitary and all the forms will be kindled to work the all side conscience by the one Etheric in its control.

**9-25 p.m.**

By this the Planetary will be in control and it should be seen how it works.

Today to CV's Conscience is given of her Self Etheric level.

As already said that the delay is due to the want of development to C.V. is to test her system as per view of the Self in its last test and found out that it stood.

further an another trial is made by the Self Stability that an Etheric Controls the whole system of the Planetary or not before it takes that work to guide the human forms as Eternal type in the Kundalini field.

M. Venca

**4" p.m.**

**Sep 7" 21.W.**

By the touch of the C.V.'s Etheric with the World's Comet tyre may disturb the health of her and also will cause many disturbances to attend to this work.

**74 kinds of pressures will be given to the Comet tyre and by that Earthquake too may cause.**

**There is a chance to the astral developing persons to show their feats.**

214

From the Sep 10" 21 this work will begin to regulate the tyre as to reach the Etheric on Sep 23" 21.

By this pressure the Cosmic will receive the same from it and will Cause the Planets to act simultaneously to lead the pressure to the self & to the Earth.

**7-35 p.m. "Stability Working" Sep 15" 21 Th.**

From the World Comet tyre to mark the grades.

According to K key and in 100 squares work is to take one Purusha, Prakrithi in one square.

This square will reveal only of the present working evolution and not of all.

So this line began to have touch of all the Squares by its boring.

This began to trace the cause from the very beginning point up to human formation by Kundalini by Chandu stability posting it in outer in its trial.

This work begins in the beginning

**8" p.m.**

from Bindhu level in Venca and also to Chandu stability.

View tries here to separate the Purusha from the Prakrithi and while moulding work is going on it tries to attack to Conscience so as to have knowledge of all the Squares work to the stability of the Chandu, and also to the Etheric of Venca to have all Purushas work.

So this Etheric is developed to the level of Purusha form which is of above the Prakrithi grade, and the stability too was also made to attain the same result.

By the view's Kindling a source is giving to the very high level above the Purusha and the beginning of Kundalini formation from the consolation ground and to its further causes.

215

to Venca & to Chandu's stability knowledge

Then to make travel in all these level is given to Venca Etheric after the birth of Chandu.

In the same time the Etheric was placed to show the Purusha work to its Prakrithi i.e. physical body to give conscience to it and observe how it acts

By this the Etheric is capable to touch all the levels.

**8-45 p.m.**

Then it begins to bore all the Kundalini levels in the inner forms.

This level is a tyre form before a cover is given to Kundalini type.

As in diagram the two cups must go in as a globe as Kundalini and this tyre becomes as Comet tyre.

**7-30 p.m.**

**Sep 21" 21.W.**

C.V. working and regulation.

### Experiment spirit

Is a one above the level of the specific this should be taken as a plural one.

Since the 10" instant the working given is – that this spirit is to reach the physical level from Comet tyre and vice versa.

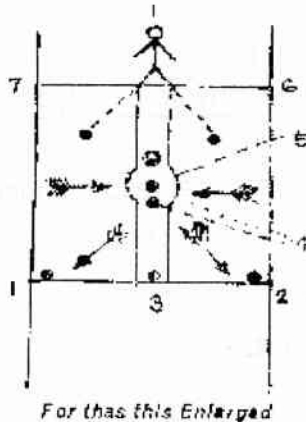

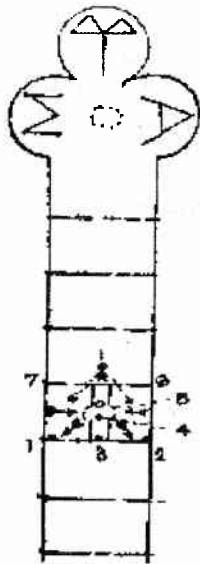

On the 17" inst the Etheric had touch with the spirit which has kept to work in the Memorandum below with its other spirit that went to higher region.

With this want as it could not reach the Prana levels, so connects this to have more speed to have the experience of Prana levels.

**7-55 p.m.**

1. Triple cover is to work as down to

## 2. Tric cover

7-35 p.m.

Sep 22" 21.Th.

"Critical juncture"

Below S.S. mark in 10 divisions.

Chandu's effect is a critical juncture. This was carried by the New stability of S.S. to the P.Nirvanic portion and receives the Prana for the want.

This causes here to be in prepared state to receive here has been worked by the use of the sound 'critical juncture'.

By the words "Critical Juncture" the first word takes the figure as 'Wet we me' to 'Net we go' then finding that there is no We goes to find the We i.e. the Stability.

Why this critical has occurred?

8-05 p.m.

Because the Stability We is not there. So the working principle goes too have touch of the juncture. By this it is in a state to receive the Prana.

By this Chandu stability is kept not shrink the Net progress

"Wake up" was used by your Self means removing it from the Critical point to another space.

Even though it has become vacant 'Wake up' again kindles to work the same Memorandum.

1. From critical to cross it again.
2. From vacant to run the Memorandum

S.S. goes to supply Prana.

Finding that S.S. will be in difficulty in finding the Prana level the Ex.

8-45 p.m.

gives in Sound as '**Supply**' to S.S. New Stability.

8 levels in Tric form advice was received by S.S. for Treatment.

By the touch of A level as 10" grade in Hanger's stability level a touch of the course A progress downwards being Prana level, the Ex spirit gives to downwards the 10" grade levels also.

9-15 p.m.

10" p.m.

When the C.V. Etheric touched the Prana level again on the 17"

First level is **Wools air**.

Prana level goes in 10 centi grades = 10,000.

**Prana - Steam - air**

Water if it is converted into steam it comes out in small quantity.

From steam to air state the same is shown.

That came out as air state is called '**Prana**' level.
